

Prepare for CMMC Certifications now with PeopleTec Advisory Services!

PeopleTec is a Cybersecurity Maturity Model Certification (CMMC) Registered Provider Organization (RPO) providing consulting, gap assessments, & network engineering services to members of the Defense Industrial Base (DIB) seeking CMMC certification. Leveraging PeopleTec expert resources will prepare your organization seeking CMMC certification for an eventual CMMC assessment of compliance requirements. In the meantime, you can accelerate time to certification with the following CMMC advisory services from PeopleTec.

Gap Analysis: Defines the full or tailored CMMC architecture scope for assets that process, store, transmit and protect FCI and CUI data; Analyzes and provides a roadmap and recommendations for meeting CMMC practices and processes

Documentation Services: Supports the development or updating of specified CMMC documentation that meets CMMC level requirements; Provides recommendations on standard evidence that supports process and engineering requirements

Process Consulting Services: Provides requirements driven recommendations on new or modifications to existing processes and operations that align with documentation and meet CMMC requirements

Engineering Consulting Services: Provides technical recommendations on architecture, configuration, tooling, reporting, and automation to meet applicable CMMC level requirements
