- Scheduling

TCM provides:

- ✓ Centralized Skills Management
- ✓ Consolidated Operational Assessment
- ✓ Streamlined Communication
- ✓ Certification of Proficiency
- ✓ Deployment of the best workforce

KEY BENEFITS

- Save time - stop entering data in duplicate systems
- Increase visibility of professional development
- Enhance awareness of skill development
- Reduce work assignment risk

Use the actual flow of work to derive - skills, assessments, and qualifications

Monitor and manage the training level, certification, compliance of your employees while saving time and providing awareness at all levels of your organization

- Intelligent system maximizes data value in your existing work systems by mapping employee transactions to job, industry, or group skills/standards classifications
 - User defined workflow processes for evaluation, certification, and performance counseling – tailorable to your organization's structure
 - Resultant skills, abilities, and qualifications readily visualized at all levels from the employee to the executive management level
 - Conduct objective, automated risk assessments for specific, critical activities
- Let the PeopleTec team explain how TCM can increase your productivity and awareness while reducing operational risk
